

# GLOBAL ENGAGEMENT

ANNUAL  
REPORT  
2017-2018

Our students, faculty, and community are committed to being globally connected. Wolverines have become outstanding global ambassadors who, through faculty support, are now more culturally educated. During this past year, the Office for Global Engagement has orchestrated a variety of programs that have allowed our students to succeed in a globally interdependent community. Our mission is to continue to create these opportunities in order to empower our students to be competent and confident leaders and world citizens. We welcome the world to our campus and we extend an invitation to all to observe, experience, and learn the beauty of other nations, their history, culture, and traditions.

One of our great highlights for this academic year has been the designation given to Utah Valley University by the United Nations Department of Public Information as an associate member. This outstanding recognition will allow our students and faculty to have a voice and a representation when dealing with world affairs right at the United Nations (UN). This upcoming academic year, we are launching a campaign to educate our campus community on the 2030 UN Sustainable Development Goals. Be on the lookout to identify these 17 goals and see how UVU is supporting them.

In the 2018-19 academic year, we will spotlight the United Kingdom of Great Britain and Northern Ireland, conduct many faculty-led study abroad programs, develop hubs for international internships, and invite dignitaries and ambassadors to our campus. Furthermore, we will continue to strengthen our relations with the state of Utah's public dual language programs by conducting language fairs on campus. We are living in challenging, yet exciting global times. As an academic institution, it is our responsibility to educate our students to be exemplary world citizens.

As Mark Twain said, "Twenty years from now you will be more disappointed by the things you didn't do than by the ones you did. So throw off the bowlines; sail away from the safe harbor. Catch the trade winds in your sail. Explore. Dream. Discover."

*Without question, UVU has a robust commitment to global engagement for our staff, our faculty, and the wider community. Our students have numerous, exciting opportunities for study abroad participation and international internships with the UN, governmental organizations, and humanitarian efforts. Our faculty not only lead our student international experiences, they draw on their own professional associations and experiences to strengthen our international partnerships and bring critical global perspectives to their lectures and coursework. And, all throughout the year, UVU welcomes the community to engage more deeply and meaningfully with the broader world through diplomatic conferences, dignitary events and lectures, and Utah's dual language immersion program. We are proud that UVU's strong international and intercultural relationships help our students keenly navigate and flourish as leaders in the globalized world in which we live.*

Sometimes we harmonize better than others, but really this is where it matters. It’s the people-to-people exchanges. It’s the networks we build in opportunities like this that really build a good relationship between countries and between nations and, most importantly, within humanity.”*

# GLOBAL PROJECTS

The Office for Global Engagement works with UVU schools and colleges in the creation of partnerships with other academic institutions across the globe. These programs allow students and faculty to enrich and broaden their academic experience in a global setting. Our office offers support by providing initial contacts with foreign institutions, establishing international agreements, and assuring full program implementation.

## SPAIN

The Office for Global Engagement supports MBA business projects and assists with developing global partnerships. During the 2017-18 academic year, an outstanding project was conducted between UVU's MBA program and a prominent Spanish nation-wide recognized engineering firm, INDAR. MBA students conducted a market value research project to assist with the company's operations, a true representation of Global Engagement at its best.

## FINLAND

The Office for Global Engagement in conjunction with the UVU School of Education established educational partnerships with the University of Turku and the Ministry of Education in Finland. For one week, Utah educational leaders participated in a series of workshops, in-service, and classroom visits to study best practices found in the world's leading education nation. Representatives from the Utah System of Higher Education, State of Utah Board of Education, administrators at universities and public schools from the State of Utah and the State of Washington participated in this educational experience.

“I worked with a Brazilian startup tech firm called Contabilizei Contabilidade. Being an intern in Brazil was one of the most amazing experiences of my life. I got to learn Portuguese while I was there. I learned about Brazilian customs, dancing, music, and food. I also got to learn and share my ideas in the Human Resource department (but that’s not as cool as the culture stuff). I met many amazing people who will be lifelong friends! I’m definitely going back sometime!”

# INTERNATIONAL PHOTO CONTEST

For the past 13 years, the Office for Global Engagement has hosted the Annual International Photo Contest where UVU faculty, staff, and students can submit up to three photos that were taken abroad. Every year we are more impressed by the submissions that we receive. From Scotland's rolling green hills and castles to the top of Machu Picchu in Peru, we admire every photo and find it fascinating to see what others experience abroad. Winning photographs are unveiled every November and remain on display in the Office for Global Engagement for one calendar year.
